† *Folkland*. *Obs. exc. Hist.* A term of OE. law, designating land held by a certain kind of tenure; opposed to *BOOKLAND*.

As to the nature of the antithesis between folkland and bookland there have been many conjectures. Since the publication of Allen's *Inquiry into the Growth of the Royal Prerogative*, 1830, the prevailing view has been that folkland was land belonging to the state, which the king or the witan might grant to a person for his life, but which did not descend to heirs, while bookland was land held by charter or deed. But in the *Eng. Hist. Rev.* VIII. (1893) Prof. Vinogradoff has forcibly argued that folkland was simply land heritable by folkright or common law, while the estate in bookland was conferred by charter or deed, and could be alienated freely.

a. 1000 *Laws Edgar* § 2 Obbe on boc-lande obbe on folc-lande. 1641 *Termes de la Ley* 54 This land was held with more ease and commodious conditions than Folkland. 1767 BLACKSTONE *Comm.* II. 91 Folk-land... was held by no assurance in writing, but distributed among the common folk or people at the pleasure of the lord. 1820 J. ALLEN R. *Prærog.* (1849) 125 Folkland, as the word imports, was the land of the folk or people. It was the property of the community. It might be occupied in common, or possessed in severalty; and, in the latter case, it was probably parcelled out to individuals in the folegmet. But while it continued to be folkland, it could not be alienated in perpetuity; and therefore, on the expiration of the term for which it had been granted, it reverted to the community, and was again distributed by the same authority. 1873 FREEMAN *Norm. Conq.* (1876) IV. xvii. 24 The folkland, the common land of the nation, was now [1066-7] changed, fully and for ever, into terra Regis, the land of the King.

Follow (fō-lou), *sb.* [f. next verb.]

1. The action of the verb FOLLOW.

1870 HARDY & WARE *Mod. Hoyle*, Dominoes 93 It is sometimes an advantage to hold heavy dominoes, as they not unfrequently enable you to obtain what is called a good 'follow'. 1889 *Spectator* 9 Nov. 635/1 And hark! the view-hollo! 'Tis Mack in full follow.

2. **Billiards.** A stroke which causes the player's ball to roll on after the object-ball which it has set in motion. Called also *follow-stroke*, and *following stroke*. Also, the impulse given to the ball by such a stroke.

1873 BENNETT & CAVENDISH *Billiards* 371 The reason for playing with side is, that, when the balls are so close, sufficient 'follow' cannot be got on. 1881 H. W. COLLENDER *Mod. Billiards* 38 The Follow-Stroke. *Ibid.* 39 The 'follow' can also be executed with the cue delivered as far as one-fourth below centre.

3. **Follow on.** *Cricket.* The act of 'following on' (see FOLLOW v. 19 d); also applied to the innings itself. Also simply *follow*.

1881 *Standard* 14 June 3/8 A 'follow on' was necessary. 1884 *Littell's Cricket Ann.* 60 With the follow saved there was no chance of completion of the game. 1892 *Sat. Rev.* 9 July 35/1 In the follow on things altered very much.

Follow (fō-lou), *v.* Forms: *a.* 1-2 folzian, 2-3 folzie(n), (folzhi), folze(n), (folozi), 3 folien, folhen, 2-4 folze(n), (3 *Orm.* follzhenn, 4 *south.* uolze(n), uolzy), 3-5 folow(en), (3 *south.* uolewen, 4 folow(e), folwe(n), 4 folowe(n), folu(n), folu-w(en), 3 *south.* uoluw(en), 4-6 folow(e), foloe, 5 folaw(e), foloze, foloy(n), 4-6 folow(e), 6 foolow(e), 6 *Sc.* fallow, 4-7 followe, 4- follow. *B.* 1-2 fylzan, fylisan, fylzian, fyltan, 2-3 fulien, (3 *south.* pa. t. vulede), 3-4 fulu(n), filze(n), filiz(en), filyh(en), filyh(en), folu(n), 4-5 folow, fylow, felow, 5 foloe. [The two OE. types, *folgian* (o-stem) and *fylgan* (yo-stem), are, as is usual in similar pairs of conjugational variants, representatives of an OTeut. v. of the *-ējan* class; cf. OFris. *folgia*, *folia*, *fulia*, OS. *folgān* (Du. *volgen*), OHG. *folgēn* (MHG. *volgen*, mod. Ger. *folgen*), ON. *fylgja* (Da. *følge*, Sw. *följa*); not recorded in Goth. Beside these forms, several of the Teut. langs. have synonymous and phonetically resembling words which are compounds of GAG and Go vbs.; OE. has *fulgangan*, pa. t. *ful-ēode* (from *ēode*, serving as pa. t. of *gān*) = OS. *fulgan*, OHG. *folle gān*. The most natural explanation of these parallel forms is that the apparently simple v. was originally a compound or a phrasal combination. The first element occurs in OE. *fylstan*, *fulkēstan*, OHG. *follestein* to help, succour, minister to (cf. Goth. *laistjan* to follow), OHG. *folazian* to assist, support (= OE. **fultēn*, whence *fultēam*, *fultum* assistance), Goth. *fulla-fahjan* to worship, serve, minister to the needs of. In these cases the prefix seems to add to the sense of the simple vbs. the notion of doing something by way of service to another (so that sense 3 of the present v. is probably nearest to the original meaning). It is on formal grounds probable that the prefix is identical with **FULL**; its function in the above-cited instances is perh. due to the circumstance that in some vbs. compounded with it the primary sense of 'satisfying' developed into the cognate sense of 'ministering to', 'serving to'.]

5. A popular name for any costly structure considered to have shown folly in the builder.

R. Wendover says that when (in 1228) a castle which Hubert de Burgh had begun to build, near the Welsh border, had to be razed to the ground on account of a treaty concluded with the Welsh, much amusement was excited by the recollection that Hubert had given to the building on its foundation the name of 'Hubert's Folly' (*Stultitia Huberti*). It was remarked that he had shown himself a true prophet. Probably the word used by Hubert was F. *folie*; the original meaning seems to have been *stultitia*, but 'delight', 'favourite abode'. Many houses in France still bear the name *La Folie*, and there is some evidence that 'the Folly' was as late as the present century used in some parts of England for a public pleasure-garden or the like.

2. The device of a 'fool's cap' used as a watermark for paper.

It has been asserted that the fool's cap mark was introduced by Sir John Spielmann or Spilman, a German who built a paper-mill at Dartford in 1580; but we have failed to find any trustworthy authority for this statement. The Brit. Mus. copy of Rushworth's *Hist. Coll.* (1659) is marked with this device. The watermark called by Sotheby (*Princ.* III.) a 'fool's cap', and said by him to occur in some copies of Caxton's *Golden Legend*, seems not to be correctly so called. The catalogue of the Caxton Exhibition (1877) states that examples of the fool's cap, dating from 1479, are found in a German collection there exhibited. There is no foundation for the often-repeated story that the Rump Parliament ordered a fool's cap to be substituted for the royal arms in the watermark of the paper used for the journals of the House.

1795 DENNE in *Archæologia* XII. 121 The Fool's cap is not in either the Paston Letters or Mr. Ord's Plates. The date of that device in Mr. Fisher's is as late as 1661.

20. Law. Foot of a fine (AF. *fee*, Anglo-Lat. *pes*): that one of the 'parts' of a tripartite indenture recording the particulars of a fine (see FINE *sb.* 1 6 b), which remained with the court, the other two being retained by the parties.

When the undivided sheet was placed so that this counterfoil could be read, it was actually at the 'foot' of the parchment (the extant 'feet of fines' have therefore their indentation at the top); in the other two counterparts the direction of the writing was at right angles to that of the 'foot'. The expression *pes indenturae* 'foot of the indenture' also occurs. Horwood's suggestion, that the term (L. *pes*) arose from a misinterpretation of AF *pes*, *païs*, 'peace' is baseless.

(cf. the origin of MHG. and mod. Ger. *vor* from OHG. *fora*); it may however represent a parallel formation on the same stem with some other suffix. Another formation on this stem appears in OS. *fur*, *furi*, OHG. *furi* (MHG. *uur*, mod. Ger. *für*) prep., for, ON. *fyr* (Da. *for*, Sw. *för*) *adv.* and *prep.*, before, for. The use of *for* as a conj. has not been found earlier than the 12th c. The older lang. supplied the place of the conj. by locutions in which *for* prep. governed a nenter demonstrative pronoun followed by a relative particle: *for ðon ðe*, *for ðý ðe*, etc. (see *FOR-THON*, *FOR-THY*). The conjunctive use of *for* = *for ðon ðe* may be explained either as an extension of the functions of the prep. to govern a noun-sentence, or as an ellipsis.

In OE. *for* and *fore* seem to have been used indiscriminately as preps.; in ME. they were gradually differentiated.]

In the 15-16th c. the L. use of the accus. and inf. was often imitated in Eng.; e.g., 'Behold how good . . . it is, brethren to dwell together in unity' (*Ps. cxxxiii. 1*, Prayer-bk. version).

For-, pref. 1 Also i fœr, 3 Orm. fœr, 3-4 south. vor-, ver-, 4 fur-, 6-7 fore-. [OE. *for-*, *fær* = OFris. *for*, *far*, OS. *for*, *far* (Du. *ver*), OHG. *far*, *fir*, *fer* (MHG. and mod. G. *ver*), ON. *for* (Sw. *för*, Da. *for*); the ON. *fyrer* (see *FORE*-pref.) though formally distinct, often corresponds in use with this prefix. The OE. form (like the other forms quoted) seems to represent (with obscured vowel due to absence of stress) the three OE. prefixes **fer*-, **fir*-, **fur*- (Goth. *fair*-, *fra*-, *fair*-), which correspond formally to Gr. *περι*-, *πρὸ*-, *παρ*-, representing various ablaut-grades of the Aryan root **pr*-. see *FOR* and *FORE*. Functionally, the three prefixes do not seem to be clearly distinguished even in Gothic; but in most cases when a vb. with OE. *for*- or Ger. *ver*- has a Goth. equivalent, the prefix appears as *fra*-, which seems to have been orig. its stressed form: cf. the two OE. forms *fra*- and *for*- (see *FORCOUTH*), which are believed to be accentual variants of the representative of pre-Teut. **pragito*-, despicable.

From the predominant meaning of the root, it may be inferred that the primary notion expressed by the prefix is that of 'forward, forth'. The various uses in the Teut. langs. may be plausibly explained as originating from this, though the exact process of their development is in many points uncertain: see Grimm's *Deutsches Wb.* s.v. *ver*-. The vbs. formed with this prefix often correspond in signification to Gr. vbs. formed with one or other of the cognate prefixes *περι*-, *πρὸ*-, *παρ*-, and to Lat. vbs. with *per*- or *pro*-.

A prefix used to form verbs and adjs., primarily occurring in OE. words of Com. Teut. or WGer. origin, but employed in the formation of new words down to the beginning of the mod. Eng. period; it is now entirely obsolete. Its various functions are enumerated below. The words here explained

10. Giving to an adj. the sense of an absolute superlative, 'very', 'extremely'; as *for-black*, *cold*, *dry*, *dull*, *faint*, *great*, *hoar*, *old*, *weary*; *fordead*, utterly speechless and still.

[OE. had *for-wel*, very well, very, *for-éade*, very easily, *for-oft*, very often; a stressed variant of the prefix is *fre*, as *framéat* 'eximius', *frefétt* 'praecipuus', *frefofstiltte* 'propre'. Cf. ON. *for-títtill*, very little, *for-míkkill*, very great, etc.; also the use of Sw. *för*, Da. *for*, in the sense of 'too'. It is remarkable that nearly all Chaucer's examples of these compounds admit of being explained as instances of *for* prep. governing an adj.; thus in the quotes. below, *for-blak* may be taken as 'for black (that it was)', 'for blackness'; *for-drye*, as *whit* as chalk (that it was), omitting the comma, 'as white as chalk for dry (that it was)', 'on account of being so dry'. It is possible that Chaucer himself may have apprehended the combinations in this manner.]

For-, *pref.*², OE. *for-*, is identical with *For prep.*, and in OE. and ME. it occurs frequently as a variant of *FORE-*, with the senses 'before', 'in front', 'on behalf of', etc.; cf. 11. *Physics*, etc. Used in various senses developed from the older popular uses, and corresponding to mod. scientific uses of *L. vis*.

a. (= Newton's *vis impressa*: cf. sense 5). An influence (measurable with regard to its intensity and determinable with regard to its direction) operating on a body so as to produce an alteration or tendency to alteration of its state of rest or of uniform motion in a straight line; the intensity of such an influence as a measurable quantity.

Recent physicists mostly retain the word merely as the name for a measure of change of motion, not as denoting anything objectively existing as a cause.

1665 SALUSBURY *in Galilei's Mech.* 294 It will... be better, the Force that moveth the Weight upwards perpendicularly... being given, to seek the Force that moveth it along the Elevated Plane. 1686 NEWTON *Let* 20 June in Brewster *Life* I. 440 In one of my papers... above fifteen years ago, the proportion of the forces of the planets from the sun, reciprocally duplicate of their distances from him, is expressed. 1803 J. Force in Reg. Adv. Phys. Sc.* (1885) 357 Unit force is, that force which, whatever be its source, produces unit momentum in unit of time.

b. (cf. sense 2). Formerly used for what Leibnitz called *vis viva*, now known as kinetic energy, and often extended to include potential energy: see ENERGY 6. *Conservation of force*: see CONSERVATION.

1841 *Penny Cycl.* XXI. 307/1 The high tide at Chepstow is accounted for on 'the principle of the conservation of force'. 1870 JEVONS *Elen. Logic* xxiv. 209 Force cannot be created or destroyed by any of the processes of nature.

c. The cause of any one of the classes of physical phenomena, e.g. of motion, heat, electricity, etc., conceived as consisting in principle or power inherent in, or coexisting with, matter; such principles or powers regarded generically.

According to the now prevailing view that all physical changes are modes of motion, *force* in its generic sense comes to denote the one principle of which the separate *forces* are specific forms. But sense 11 *c* is no longer recognized as belonging to the technical language of physics.

1732 BERKELEY *Alciph.* vii. § 9 Force is that in bodies which produces motion and other sensible effects. 1842-3 GROVE *Corr. Phys. Forces* (1846) 8, I therefore use the term Force... as meaning that active principle inseparable from matter which induces its various changes. *Ibid.* 21 If Heat be a force capable of producing motion, and motion be capable of producing the other modes of force. 1851 CARPENTER *Man. Phys.* (ed. 2) 10 A large number of phenomena... resulting from the agency of forces as distinct from those of Physics and Chemistry, as they are from each other... the forces from whose operation we assume them to result, are termed vital forces.

d. trans. and fig. An agency, influence, or source of power likened to a physical force.

b. In recent use, after Carlyle, often applied more or less disparagingly, e.g. to rules unintelligently or slavishly followed, to fettering conventionalities of usage, to beliefs held or professed out of mere acquiescence in tradition, etc.

Carlyle's use of the word was clearly suggested by the words used of Mirabeau by his father, 'Il a hérité toutes les formules'. This really meant that M. had unreflectingly 'swallowed' the watchwords, or cant phrases of his revolutionary friends; but Carlyle mis-translated *heredité* 'swallowed up, made away with', and frequently used it to the passage as thus misinterpreted. Carlyle's use of *formula*, however, though suggested by a mistake, is itself a very natural development from the ordinary sense. 1837 **CARLYLE** *Fr. Rev.* III. II. i. D. *Forth-* in composition. In OE. and ME. the combinations of *forth* adv. with vbs. are hardly to be considered compound words; whether the adv. precedes or follows the vb. depends on euphonic or other conditions which do not affect the sense. The agent-nouns, nouns of action, and ppl. adjs. corresponding to these verbal locutions were formed by prefixing *forth-* to the verbal noun or adj. corresponding to the verb. In mod. Eng. compound vbs. formed with *forth-* are rare; but *forth-* is often used as a prefix in the formation of nouns of agent and action, and ppl. adjs. corresponding to the verbal phrases (compound verbs in sense but not in form) in which the adv. follows the verb. More frequently, however, the agent-noun, etc. is followed by the adv.; thus we have a *seller forth*, but **forthseller* is app. not recorded. For the formation of ppl. adjs. the prefix is the only means available; and in poetry from Pope onwards it is very common in pres. pples.

In some OE. and ME. words, *forth-* appears as a substitute for *FOR-*: see *FORTHFATHER*, *FORTHWARD*, *FORTHWITH* 2.

The more important compounds of *forth-* will be treated in their alphabetical place as Main words; those enumerated in this article are nonce-words or of rare occurrence.

Forwards (fɔːrwɔːdz), *adv.* (and *a.*) [f. FORWARD with *advb.* genitive -s; see -WARDS.]

A. adv. = FORWARD *adv.* in its various senses.

The present distinction in usage between *forward* and *forwards* is that the latter expresses a definite direction viewed in contrast with other directions. In some contexts either form may be used without perceptible difference of meaning; the following are examples in which only one of them can now be used: 'The ratchet-wheel can move only *forwards*'; the right side of the paper has the maker's name reading *forwards*'; 'if you move at all it must be *forwards*'; 'my companion has gone *forward*'; 'to bring a matter *forward*'; 'from this time *forward*'. The usage of earlier periods, and of modern dialects, varies greatly from that of mod. standard English. In U.S. *forward* is now generally used, to the exclusion of *forwards*, which was entimated by Webster (1832) as 'a corruption'.

b. *Free school*: 'a school in which learning is given without pay' (J.).

It has been denied that this was the meaning of 'free (grammar) school', *L. libera schola grammatica*, as the official designation of many schools founded under Edw. VI. The denial rests on the two assertions of the disputable; that the Eng. phrase is a translation of the Latin, not the reverse; and that *liber* could not mean 'gratuitous' in medieval any more than in classical Latin. Many different interpretations of the adj. have been proposed: (1) exempt from ecclesiastical control; (2) exempted by licence from the operation of the statute of mortmain; and hence entitled to hold property (to a limited amount); (3) giving a liberal education; (4) 'privileged' or 'authorized'. We have failed, however, to find any example in which the interpretation 'gratuitous' is inadmissible (though the schools called 'free' were often gratuitous only to select number or class of scholars); and there is abundant proof that this interpretation was already current before the time of Edw. VI.
